Anime Audience Engagement: Overview

Source: Kaggle “Top Popular Anime” (Jikan/MyAnimeList), 28,825 raw rows; 28,607 after removing 218 duplicates. Audience rating volume is used as the engagement proxy. Adult-tagged titles (Hentai, Erotica) are excluded by default. Year charts end at 2025 (a partial year). The score trend shows only years with 30 or more rated titles.

Action had the highest Total Ratings (269774851) and Award Winning had the highest Weighted Avg Score (8.36).

Genre scale vs. quality: audience size and weighted score

Total Ratings and Weighted Avg Score by genre_name

Each dot is a genre. Titles with several genres count in each one, so genres overlap. Scores are weighted by number of ratings. Adult-tagged titles (Hentai, Erotica) are excluded.

What is happening: Action has the largest audience, about 49% of all ratings (269.8M), with a weighted score of 7.69, close to the overall 7.67. Award Winning scores highest (8.36) on a much smaller audience (41.1M ratings, about 7%). Drama combines a large audience (135.6M ratings, about 25%) with a high score (7.96). Titles with no genre tag score lowest (6.70) and draw almost no audience (about 0.4%).

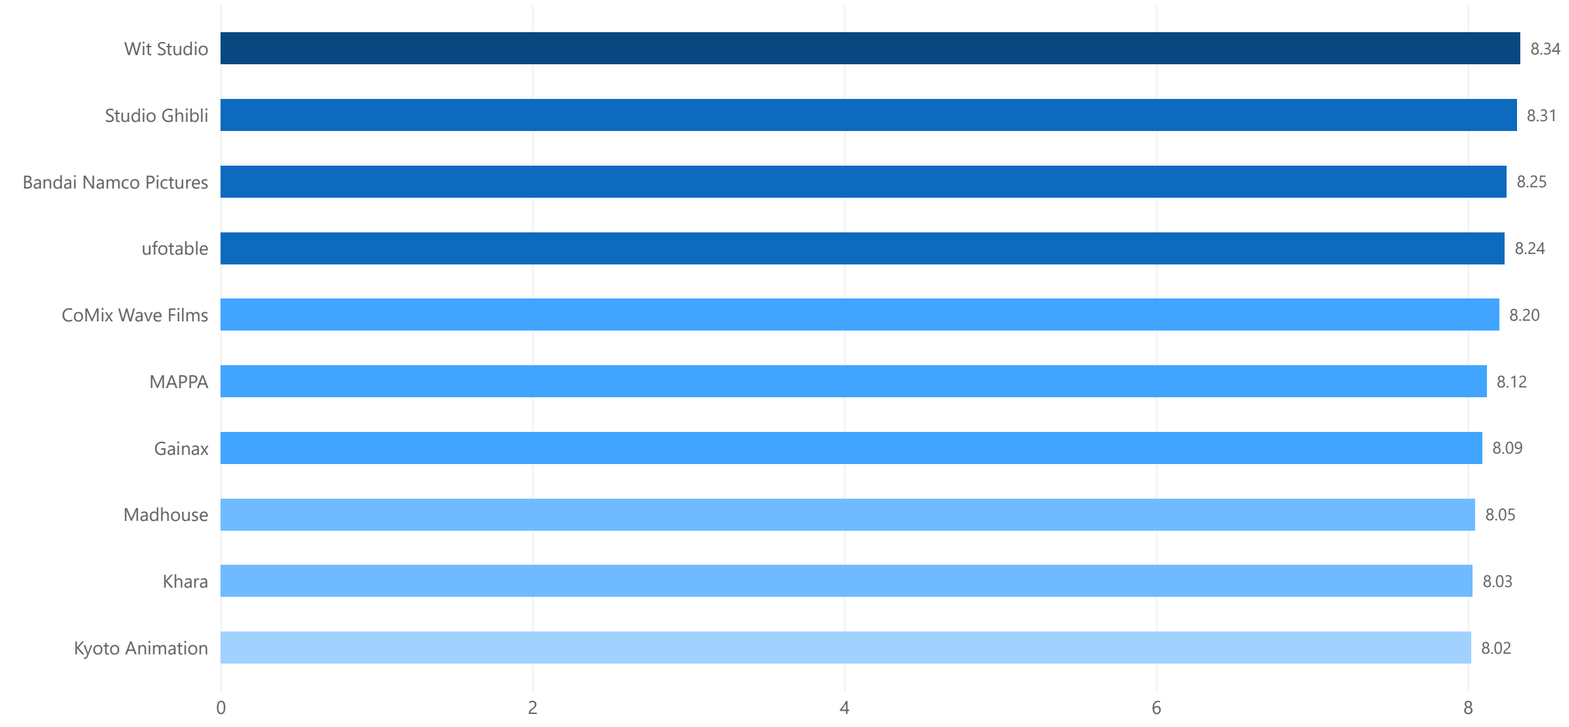

Why it matters: audience size and rating quality don't move together here. The biggest genres land near the average, while some mid-sized genres score well above it.

What to consider: Drama stands out for pairing scale with quality. Award Winning rates highest, though it rests on 223 rated titles and genres overlap, so treat it as a lead to investigate, not a conclusion.

Top 10 studios by weighted average score (min. 20 rated titles)

Studio Score (eligible) by studio_name

What is happening: 135 studios have at least 20 rated titles, and together they average a weighted score of 7.71, slightly above the overall 7.67. Wit Studio leads at 8.34 (93 rated titles), followed by Studio Ghibli (8.31) and Bandai Namco Pictures (8.25). The top 10 span only about 0.3 points, from 8.34 down to 8.02.

Why it matters: a high score doesn't mean wide reach. Among the top 10, Madhouse's titles have 32.2M ratings, while Khara's have 1.3M.

What to consider: read studio scores together with audience size. Khara (23 rated titles) and Studio Ghibli (52) rest on smaller catalogs than Madhouse (368), so treat their scores as indicative, not conclusive.

Studio notes: a title with several studios counts toward each of them, so studio rows overlap. Titles with no studio listed (about 41% of the raw data) are excluded from this page. Only studios with 20 or more rated titles are ranked. Adult-tagged titles (Hentai, Erotica) are excluded.
